TL-WPA2220_V1_130402 Download Published Date: 2013-04-02 Language: English File Size: 940 KB Modifications and Bug Fixes: First firmware for TL-WPA2220 V1 Added wifi clone function. Added wireless domain login function. Notes: For TL-WPA2220 V1 To Use Third Party Firmware In TP-Link Products Some official firmware of TP-Link products can be replaced by the third party firmware such as DD-WRT. A dialog window will appear to report the success of this operation. The Set All Devices' Network Name function allows you to change the logical network of all devices that appear on the Network configuration homepage whose Device's Password had been entered for the same logical network. Wrong firmware upgrade may damage your device and void the warranty. Situation 1 is applicable to all the Ethernet PLC adapters. Dissatisfied with product Too Complicated Confusing Title Does not apply to me Too Vague Other We'd love to get your feedback, please let us know how we can improve this content. Use decompression software such as WinZIP or WinRAR to extract the file you download before the upgrade. To perform a factory reset, please follow the instructions as below: TP-Link is not obligated to provide any maintenance or support for it, and does not guarantee the performance and stability of third party firmware. There are two situations. (Normally Vx.0=Vx.6/Vx.8 (eg V1.0=V1.6/V1.8). Vx.x0=Vx.xx6/Vx.x8 (eg V1.20=V1.26/V1.28) How to find the hardware version on a TP-Link device? Step 2 Insert the source CD in the computer or click here to download the utility from TPLINK official website, and then click on Management utility to install the management utility. Reset Local Device: Click this button to reset the settings of the local Powerline Adapter device only. Damage to the product as a result of using third party firmware will void the product's warranty. To set all devices' network name, please type the name in the field and click the Set Network Name to apply the setting. Do NOT turn off the power during the upgrade process, as it may cause permanent damage to the product. Note: Do not turn off the device while the firmware is being upgraded. Download PIB file and firmware upgrade file from the TP-LINK website 2. Open Source Code For Programmers (GPL) Please note: The products of TP-Link partly contain software code developed by third parties, including software code subject to the GNU General Public License ("GPL"), Version 1/Version 2/Version 3 or GNU Lesser General Public License ("LGPL"). To Upgrade IMPORTANT: To prevent upgrade failures, please read the following before proceeding with the upgrade process Please upgrade firmware from the local TP-Link official website of the purchase location for your TP-Link device, otherwise it will be against the warranty. You receive the GPL source codes of the respective software used in TP-Link products for direct download and further information, including a list of TP-Link software that contain GPL software code under GPL Code Center. A firmware update can resolve issues that the previous firmware version may have and improve its current performance. See the respective GNU General Public License for more details. Step 1 Connect the TL-PA4010 to a windows computer via an Ethernet cable and power it on. The device will reboot after the Upgrading has been finished. What's your concern with this article? Note: Every Powerline Adapter on your home network MUST have the same Network Password for connectivity to be established throughout your home. Reset All Devices: Click this button to reset the settings of all devices that appear on the Network configuration homepage whose Device's Password had been entered for the same logical network. To avoid wireless disconnect issue during firmware upgrade process, it's recommended to upload firmware with wired connection unless there is no LAN/Ethernet port on your TP-Link device.

First thing, I changed the Linksys wireless router's default IP from 192.168.1.1 to 192.168.2.1 and change the DHCP scope to start at 192.168.2.10. I did this because the TP-Link device uses the same default IP of 192.168.1.1 that most routers use so ...
